

Royal p33p

A game of frens

V_0.1

Royal p33p, a game of frens

Enter a next-generation blockchain-based game that combines the social and economic functions of a roleplaying game to give users the most intense experience of their lives.

Royal p33p is a Solana based p33po platform with a complete economic and gaming ecosystem that includes the finest p33po technology, products, and content. The Royal p33p platform consists of three main parts: the 4-team structure, the weekly airdrop and the p33ptoken.

The products and content function as a game and are designed to maximize user interaction and experiences. The token plans to create a sustainable and stable system of hierarchy among degenerates and the p33po mechanism is the core of this quasi-economic system.

FIRSTLY

The Royal p33p (a game of frens) is a 100% community driven game, owned by the frogs that populate the pond. The devs dont play in the pond, have no intention of holding any part of anything and are presumed missing or dead.

The Royal p33p is an experiment, an attempt on the human spirit, a camaraderie of greedy souls trapped in an endless cycle. Only its frogs and loot 2.0

Not a single thing said, presented or sold by the team of Royal p33p is to be taken seriously at any point in time.

Everybody is welcome to contribute and provide value to the p33po system, no single entity owns it and only you can prevent forest fires.

Take care of your bags.

Frogs are dope.

With a 100 different classes in 4 factions, the Royal p33p is here to provide a never-ending battle of wits.

Memetic warfare on Solana.

By frogs, for frogs.

The cavalier

-aint nobody ready for this shit.

The knight

-combat ready since it was a newt.

Fren around and find out.

don't you dare fucking fren on me-

The factions of p33po

Four factions of frogs vie for the pot at the end of the rainbow

Chose your p33p belonging to one of 100 classes, hand drawn and presented in immaculate state and fashion.

100 classes, 100 peepos per class, 25 peepos per faction, no remints, infinite mayhem.

Naming the p33pos and the factions is up to the players but for now lets call them BLUE, RED, GREEN and PURPLE.

THE GAME?

Simple.

Holding any p33p from the Royal p33p collection grants you exclusive access to your factions lounge. Using incredibly complex algorithms and cutting-edge technology, the team here at Frogsville has managed to coax a team of GRAPE engineers into working up some pure discord magic.

Each of the 4 teams present a vote by the end of a given period. How they organize and by what method they present their answer is of no consequence to Lord p33p, all that matters is an answer be given at a due date. The choices are either to not fren (attack) or to be fren (defend).

if,

- 1 team only attacks - winning team gets full airdrop of the period
- 4 teams defend + teams split 25% of the airdrop
- 2 teams attack or any team voids + airdrop goes to treasury

Royal TOKENOMICCS

p33p is a SPL token with a supply of 100,000,000 p33p. 25% of the tokens will be moved to treasury and 75% is to airdropped thru the game of Royal p33p.

Additional: TBD

How to participate in the game

The Royal p33p game is played using the p33p token and the p33po NFTs.

The p33po NFTs grant users exclusive privileges and rights and elevates them above the common pleb, while also granting access thru GRAPE, ensuring that only verified p33p holders are allowed to participate in the Royal p33p.

The token is the fuel that powers the game. It will be airdropped to all holders of the p33p NFTs in the first game of Royal p33p, starting with season 2.

Every season brings 5 new classes of p33pos to the table, with 500 p33pos available to mint.

Season 1 of Royal p33p is scheduled to launch in December 2021.

In order to participate in the Royal p33p game, players need to buy, trade for, or earn p33po NFTs.

What are you waiting for?

ARoad less mapped

- 100 classes of p33pos are to be evenly distributed amongst the community thru
- 20 seasons of p33po NFTs with incredible art and stats granting access to faction lounges
- community engagement in the building and preparation of the game
- 75% of the p33p token is to be airdropped to p33po holders
- mayhem is to be observed and venerated
- a p33p/sol LP is to be established and
- the game is open to the fifth team: everyone else

FAQ

I

/will you rug me sir?

No. There is nothing to rug. Royal p33p is a simple experiment, a byproduct of an question of what would happen if the Lord of the Flies had a baby with Facebook.

II

/is this a real game?

No of course not.

III

/Is the token worth anything?

The p33p token holds no value whatsoever.

IV

/Can lord p33p mint more p33pos and affect the rarity of my p33pos?

Lord p33p vows to never create any more of that particular p33po and you will have to try to obtain it from someone else via a marketplace or whatever.

V

Do I need a Solana wallet to buy the p33p NFTs?

You will need a Solana wallet to procure your p33pos. Lord p33p recommend using Phantom as it's an industry standard. You will need a Solana wallet for Royal p33p to deposit any p33p NFTs you purchase and/or any following game assets or associated files.

VI

Is there a team behind this?
